

Email update # 14. (2023-12-26)

Dear Humanity Projects subscribers,

We hope you are all doing well. Firstly, we want to wish all peace in this Xmas season and a great 2024. We have a feeling that 2024 will bring a lot of challenges and opportunities in our current transition to a better world. Being constructive and building new paradigms requires effort and persistence, and above all, hope (faith).

We recently updated the PIP data that analyses new disability claims in the UK. We observe that some diseases continue to reach new maximums for disability claims while others have subsided in recent months. Overall, the data shows that the rate of new disability claims has not subsided significantly and is still at very high levels. Analysis of which diseases are rising and falling is of interest for healthcare professionals who are trying to understand the phenomenon of morbidity that we observe around us.

We also reviewed the papers from Korea that provide population-based studies in the rise of non-fatal diseases that compare rates in vaccinated versus unvaccinated individuals. The results corroborate our PIP analysis.

Additionally, we also released some of our projects for external funding. This will help us expand our infrastructure, including our webservers.

1 – Open Projects for Sponsoring:

https://phinancetechnologies.com/HumanityProjects/Sponsor%20Projects/Projects_Funding_Home.htm

2 - Latest research updates:

A – Updated data for trends in new claims for PIP in the UK.

<https://phinancetechnologies.com/HumanityProjects/PIP%20Analysis-Causes.htm>

Analysis by body system:

<https://phinancetechnologies.com/HumanityProjects/PIP%20Analysis-Systems.htm>

B – Review of papers from Korea: The papers show a strong correlation between the rise in non-fatal health conditions and the Covid-19 inoculations.

<https://phinancetechnologies.com/HumanityProjects/Korean%20Adverse%20events%20population%20studies.htm>

C – Webpage with important academic references that are related to Covid-19 adverse events or efficacy.

<https://phinancetechnologies.com/HumanityProjects/References%20to%20academic%20work.htm>

3 - Issues on which we are currently working:

- US CDC deaths database analysis.

Thank you for your continued support. Your donations and support allow us to maintain and expand our research as well as provides us energy to continue in this enormous task.

Wishing you all a great holiday season and a great 2024,

The Humanity projects team
