

## **Email update # 19. (2024-9-1)**

Dear Humanity Projects subscribers,

We hope you are all doing well. We are pleased that our research is reaching more and more people and having a significant impact on changing the prevailing pandemic narrative. Thank you all for following, sharing, and to our volunteer researchers for taking time from their personal lives to help this project.

Below is an update on our latest research activities since our last update of 1<sup>st</sup> of July 2024.

### **1 - Latest research updates:**

#### ***A- US death trends from musculoskeletal diseases.***

Analysis of trends in death rates from musculoskeletal diseases, for all ages in the US. We also provide a detailed analysis of trends in musculoskeletal death rates for older individuals aged 75-84. For these individuals our analysis points towards a strong signal in UC death rates from musculoskeletal diseases, starting in 2020 and rising further in 2021, 2022 and 2023.

### **2 – Research papers/reports on which we are currently working:**

- Cardiovascular deaths in the US during the pandemic.
- Trends in deaths related to Skin Diseases.
- VAERS reports for specific causes.

Thank you for your continued support. Your donations and support allow us to maintain and expand our research as well as provides us energy to continue in this enormous task.

Wishing you all the continuation of a great 2024,

The Humanity projects team
