

US Economy outlook 2026

January 2026

Emerging worldwide recession in 2026

Within this report you'll uncover:

- Why treasury yields are set to drop in 2026.
- Why we expect disinflation in 2026.
- Why \$20 oil prices in 2026 are a serious possibility
- The main internal and external risks to the US economy.
- The risk of a housing market crisis.
- Why the stock market is in a 2000s-style bubble.
- Why investors should prepare for a high volatility (risk-off) environment.

The report package includes:

- Full 110-page report on the US Economy outlook for 2026
- Executive presentation with key insights from the report
- Video where Ed Dowd and Carlos Alegria go through the executive presentation and provide their personal views.
- Additional information: support@phinance technologies.com
