

Email update # 15. (2024-2-13)

Dear Humanity Projects subscribers,

We hope you are all doing well.

2024 started in full steam and our research is reaching more and more people. The feedback and solicitations is overwhelming but at the same time very rewarding as it shows we are having an impact. Thank you all for following, sharing, and to our volunteer researchers for taking time from their personal lives to help this project.

Below is an update on our research activities this year.

1 - Latest research updates:

A – UK Personal Independence Payments (PIP) Analysis.

This is a comprehensive report that provides an overview of the UK PIP system, by Bess Dalby. This is an important report as it contextualizes the UK PIP disabilities from different causes.

<https://phinancetechnologies.com/HumanityProjects/PIP%20Analysis.htm>

B – Papers published in Research Gate, next peer review. After being asked to publish our research in academic format so that it can then be easily referenced and distributed by other sources, we've started the process of transforming our research reports into academic papers. We have the pleasure to announce the 2 research papers that are available at Research Gate.

UK deaths and disabilities from cancer in the UK, ages 15-44:

https://www.researchgate.net/publication/378068419_UK_Death_and_Disability_Trends_for_Malignant_Neoplasms_Ages_15-44

Excess deaths methodology:

https://www.researchgate.net/publication/378042651_On_measuring_excess_mortality

2 – research papers/reports on which we are currently working:

- US CDC deaths from cancer, ages 15-44.
- Estimating Covid-19 over-reporting during the pandemic.
- UK neurological deaths, ages 15-44.
- Updating excess deaths data with the latest data.

Thank you for your continued support. Your donations and support allow us to maintain and expand our research as well as provides us energy to continue in this enormous task.

Wishing you all the continuation of a great 2024,

The Humanity projects team
