

Email update # 20. (2024-10-13)

Dear Humanity Projects subscribers,

We hope you are all doing well. We are pleased that our research is reaching more and more people and having a significant impact on changing the prevailing pandemic narrative. Thank you all for following, sharing, and to our volunteer researchers for taking time from their personal lives to help this project.

Below is an update on our latest research activities since our last update of 1st of September 2024.

1 - Latest research updates:

Since our last update we have slowed down our research efforts and focused more on preparing some media materials that will document our project and our research. However, we still have ongoing research projects that are expected to be completed before the end of 2024.

2 – Research papers/reports on which we are currently working:

- Cardiovascular deaths in the US during the pandemic.
- Trends in deaths related to Skin Diseases.
- VAERS reports for specific causes.

3 – Rumble channel for sharing the output of our project:

Having realized that most individuals these days are overloaded with information in their busy schedules, we decided to explain our research project by documenting the different stages since its start in September of 2022. For this purpose, we are creating a media webpage where we will provide social media contacts in order to follow our work more effectively.

As part of the media output, we created Rumble channel where our video content will be uploaded. When uploading our content to YouTube, we were almost immediately censored, before releasing our first video to the public. Our content was removed in order to keep the YouTube community “safe” from “medical misinformation” that goes against the guidelines from local health authorities and the WHO.

This means most certainly that we are on target and consequently our work is important to share far and wide. Efforts to suppress research that goes against the prevailing narratives is an attempt to erase this evidence from history. To try to avoid this, please subscribe to the Rumble channel, recommend it, share it.

Thank you for your continued support. Your donations and support allow us to maintain and expand our research as well as provides us energy to continue in this enormous task.

Wishing you all the continuation of a great 2024,

The Humanity projects team
