

Email update # 10. (2023-7-14)

Dear Humanity Projects subscribers,

This is an important update relative to our research efforts as for the first time we are releasing research that starts exploring the underlying causes behind the macro trends in deaths, disabilities, and injuries that we have been observing from early 2021 onwards.

In particular, we just released our UK disability analysis that investigates trends in Personal Independence Pensions (PIP) claims at the Department of Work and Pensions (DWP) in the UK. The dataset is rich in details as it provides the underlying cause for the claim. Our analysis of these trends by cause or body system (associated to the underlying cause) can now be viewed and shared on our website. The results speak for themselves and point to a worrying trend in disabilities which in our opinion are likely caused by the Covid-19 vaccine rollout.

In the context of the V-Damage project UK we also released the analysis of absence rates due to sickness by NHS workers in the UK. The results corroborate our previous findings by the analysis of absences in the UK working population as a whole. The NHS data is however more granular, which provides a better analysis of the underlying trends.

2 - Latest research update:

UK NHS Absences from sickness analysis

<https://phinancetechnologies.com/HumanityProjects/UK NHS Sickness Absence rates.htm>

UK disability analysis (PIP claims)

By Underlying Cause: <https://phinancetechnologies.com/HumanityProjects/PIP Analysis-Causes.htm>

By Body System: <https://phinancetechnologies.com/HumanityProjects/PIP Analysis-Systems.htm>

3- Issues on which we are currently working:

- VAERS data (with the collaboration of a special guest).
- V-Damage project for the UK.

Thank you for your continued support. Your donations and support allow us to maintain and expand our research as well as provides us energy to continue in this enormous task.

Wishing you all a great day,

The Humanity projects team
